

K-FLEX® INSULATION SOLUTIONS FOR DATA CENTER

SELF-SEAL INSULATION FOR CHILLED WATER PIPING

K-FLEX® self-seal insulation solutions are designed to simplify and accelerate the insulation of chilled water piping in demanding data center projects. **Available in thicknesses up to 2"**, the range includes pre-slit, factory-applied adhesive systems for small- and large-bore piping, helping contractors achieve consistent seams, reduce field fabrication and minimize material waste.

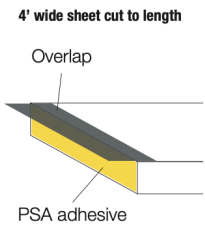

- ▶ **Piping 8" IPS or below**
K-FLEX® INSUL-LOCK DS self-seal rubber tubing

- ▶ **Piping 10" IPS or above**
K-FLEX® INSUL-SHEET rolls for field fabrication

- ▶ **K-FLEX® INSUL-LOCK DS LP** self-seal pre-cut sheet
 - 4-foot-wide sheets cut to size to fit the circumference of pipes ranging from 10" to 48".
 - Each sheet is fitted with an overlap strip applied to one side, with PSA adhesive along the same edge, which, once installed, gives it the same appearance as overlap pipes.

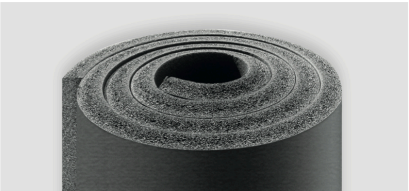

K-FLEX® IS THE ONLY MANUFACTURER THAT OFFERS THIS AND IT ALLOWS FOR LESS WASTE ON SITE AND FASTER INSTALL TIME VS. THE TRADITIONAL CUTTING METHODS FROM ROLLS.

Data center projects require reliable insulation solutions, fast lead times and efficient installation. K-FLEX® provides high-performance elastomeric insulation for chilled water piping and ductwork, supported by industry-leading production capacity and custom fabrication capabilities. From self-seal tubing to pre-cut large-pipe and duct liner solutions, our products help contractors reduce material waste, shorten installation time and improve margins on demanding, schedule-driven projects.

INSULATION FOR DUCTWORK

K-FLEX® duct insulation solutions are designed to help sheet metal shops improve efficiency across demanding data center projects. **Available in thicknesses up to 2"**, the range includes standard Duct Liner rolls and pre-cut sheets sized for commonly used metal dimensions. By reducing on-site cutting and simplifying installation, these solutions help minimize material waste, lower labor requirements and deliver faster, more consistent duct fabrication.

- ▶ **K-FLEX® DUCT LINER** rolls

- ▶ **K-FLEX® DUCT LINER** Pre-Cut Sheets
In addition to standard K-FLEX® DUCT LINER rolls, K-FLEX® offers pre-cut liner sheets sized to match the most common metal dimensions used by sheet metal shops.

K-FLEX® PRE-CUT DUCT LINER SHEETS ▶ RANGE	
▼ Width ▼	▼ Lengths ▼
1 ft	26"
2 ft	42"
2 ft	84"
2 ft	96"
2 ft	104"
2 ft	124"
2 ft	130"
3.5 ft	96"
3.5 ft	124"

ELIMINATES MATERIAL WASTE AND LOWERS LABOR / INSTALL TIME FOR THE SHEET METAL SHOP INSTALLING THE LINER.

OVERALL ADVANTAGES

- **INDUSTRY-BEST PRODUCTION CAPACITY (EXCEEDS ALL COMPETITORS COMBINED)**
- **INDUSTRY-BEST LEAD TIMES**
- **CUSTOM SOLUTIONS FOR LESS WASTE / SHORTER INSTALL TIME / MORE MARGIN ON COMPETITIVE JOBS**
